

IN THE CLAIMS

Please amend the claims as follows:

Claim 1 (Currently Amended): A gaming machine, comprising:

a gaming board including at least one winning hole whereby a prescribed number of balls is paid out as a ball falls into the winning hole, the gaming board including at least one color and/or at least one pattern; and

a display unit which displays images of a variable display game, a single game of which starts out with a plurality of symbols being displayed variably and ends with the stopping of the variable display of a plurality of symbols; wherein,

the display unit is ~~disposed on~~ attached to a reverse face of the gaming board and is configured to display at least one color and/or at least one pattern corresponding to the at least one color and/or the at least one pattern of the gaming board and at least a part of the gaming board behind which the display unit is disposed has transparency.

Claim 2 (Previously Presented): A gaming machine according to claim 1, wherein the display unit is disposed to be on the entire reverse face of the gaming board.

Claim 3 (Original): A gaming machine according to claim 1, wherein the gaming board has a transmittance rate of 30% or more.

Claim 4 (Original): A gaming machine according to claim 1, wherein the gaming board has a transmittance rate of 50% or more.

Claim 5 (Original): A gaming machine according to claim 1, wherein the part of the gaming board behind which the display unit is disposed comprises an acrylic resin.

Claim 6 (Original): A gaming machine according to claim 1, wherein the part of the gaming board behind which the display unit is disposed has a peg.

Claim 7 (Previously Presented): A gaming machine according to claim 1, further comprising:

a plurality of display units.
